

We are the leading player in the Energy sector in Greece.

Our customers are at the heart of everything we do and we constantly seek new ways to make them happy through our products & services.

To further support our growth, we are expanding our teams and we are seeking to recruit, Athens based:

## Junior Energy Market Analyst

### The role will:

- monitor natural gas markets including historical trends and future outlook
- manage natural gas agreements to minimize costs
- develop tools and models that facilitate and support demand forecasting
- participate in daily natural gas and power scheduling, according to existing procedures
- keep up-to-date with natural gas and power regulatory framework
- work closely with company's Departments to manage ad hoc requests

### Qualifications & Skills:

- Diploma in Engineering (preferably Electrical or Mechanical or Computer Engineering) with specialization in Energy
- Experience in similar position is a plus
- Excellent use of Microsoft Office 365, with strong focus on complex excel spreadsheets
- Familiarity with programming tools for data analysis & reporting (Python, SQL) will be considered a plus
- Knowledge of the energy industry and understanding of the energy market dynamics
- Fluent in English, both written and spoken
- Attention to detail and ability to work under tight deadlines
- Work equally well independently or as part of team

### We offer:

- Competitive remuneration package
- Complete access to all our learning resources
- A modern, dynamic working environment combined with a hybrid working model
- Opportunities for professional growth
