Prisma Electronics SA embarked on its journey in the field of electronic systems and technology in 1991 and continues to grow to this day in a competitive environment, establishing itself as one of the largest information technology companies with facilities in Alexandroupolis, Athens, and London

System Reliability Computer Engineer - (Job code: SRE-2401)

Job Description:

We are looking for a talented individual to join our team as a Site Reliability Engineer (SRE) and play a major part in enhancing the resilience of our system but also contribute to the cost optimization, security and compliance.

If you are an SRE/DevOps or come from a Software Engineering background but have solid knowledge of Linux, containers, SQL and automation we would love to hear from you.

What will you be doing:

- Enhancing the System Observability. Digging on the various aspects of the system to identify useful metrics and alerts
- Manage, maintain and extend the infrastructure
- Always be security aware.
- Develop platform-wide automation to provision resources required to effectively manage a distributed system
- Be a member of a Scrum team. Always lend a hand to achieve team and product goals
- Contribute ideas and suggestions on automation, technology and processes to improve cross-team collaboration

Requirements:

- Degree in Software Engineering or Computer Science
- Good knowledge of Containers Technologies (Docker)
- Experience with Linux / Windows administration and scripting
- Knowledge of networking fundamentals.
- Good knowledge of SQL (MS SQL, MySQL,)
- Be a good communicator, be constructive and show empathy to the others
- Focus on delivering quality and working software
- Fluency in English

Additional Requirements:

- Experience with Elasticsearch, Prometheus, and Grafana is highly desirable.
- Experience with a public cloud provider, such as Azure, AWS, GCP etc

What we offer:

- Competitive salary and benefits package.
- A dynamic and inclusive work environment.
- Opportunities for professional growth and development.
- Work with cutting-edge technologies on exciting projects.
- Participation in state-of-the-art projects and tech challenges

Please send your CV to address mail: ibd@prismael.com by referring the relevant Ref Code (SRE-2401).
